This is perfect Alexis. Thank you for the complete compilation so quickly!

I plan to put a cover note on this and send to John and copy OST and OWM.

Subject: RE: Cooling Water Intake Rule - ESA

Here are the key 316(b) documents and I've highlighted the pages I think are most important for Dave.

1. 316(b) ESA memo to the record — **Ex. 5 Attorney Client (AC)**
2. **Ex. 5 Attorney Client (AC)**
3. Preamble and rule — The preamble reaffirms the commitments in the 2001 MOA and includes the ESA procedures that are relevant. See pg. 48380 Section K for that discussion, in particular page 48381 column 3 to 48382.
4. 2001 Coordination MOA with the Services. See pgs. 11215-11216 for the procedures for issuance of state permits.
5. Joint Biological Opinion — Pages 68-74 describes the procedures in the rule and the Services' conclusions re: effects. The incidental take statement is on page 75-76.
6. Instructional memo to the water division directors. The memo describes the rule requirements for permitting director's relevant to listed species. We sent this memo to comply with Term and Condition #4 on page 77 of the BO.

Importance: High

Alexis and Richard,

See below. Dave would like the ESA-based components of the Cooling Water Intake Structure rulemaking, such as targeted discussion in the preamble, RTC, Bi-Op, etc., to inform his decision on the applicability of ESA to approving state CWA section 404 programs. Is that something you could pull together? Let me know if I can help with this.

We should send to Mindy when compiled.

Thanks, Steve— and Mindy, please send me those materials from OGC and the letters Dave references so that we can bundle into one email response.

Thanks!
John

John,

Could you also send me a copy of the Pete Silva memo and the ECOS letter that triggered it? And are you aware of any OGC analysis that was done in support of the Silva memo? Thanks.

Dave

Confidential; Deliberative

I'm currently evaluating a 404(g) state assumption proposal from Florida and Arizona and how to address ESA issues in state-assumed permitting. The proposal mentions the ESA process for the cooling water intake rule as a potential model. Could someone pull together the ESA-based components of that rulemaking for me, such as targeted discussion in the preamble, RTC, Bi-Op, etc. I'm not sure if this is an OGC or OWM assignment, so please work together to figure out the most efficient way to get a packet together.

Thanks!

Dave
